## **Errecom SPA warns about fake and hazardous refrigeration lubricants being sold in Turkey**

Errecom SPA has learned that fake Errecom products, more precisely refrigeration lubricants in 25-litre metal tanks, are being distributed in Turkey at a significantly lower price than the originals.

Errecom SPA aims to notify and warn consumers that these counterfeit products are not manufactured or distributed by Errecom SPA. Not only these fake products do not meet our quality standards, but as proven by Errecom's chemical laboratory, their content does not match the ingredients declared on the label. Therefore, Errecom SPA warns that their use is dangerous and damages air conditioning and refrigeration systems.

At the following URL <https://www.errecom.com/en/errecom-warns-about-fake-refrigeration-lubricants-sold-in-turkey/>, you can find more details about how to distinguish Errecom's original refrigeration lubricant tanks from the fake ones currently on the market.

Errecom highlights that its warranty covers only original products; therefore, we recommend everyone to be careful while purchasing Errecom's refrigeration lubricants.

Errecom is committed to protecting consumers by soliciting to stop the sale of these counterfeit goods with legal actions.
